I suggest you work in DiscoverText this morning. I have a call at 9:30 and will come up after that to show you how to collect comments on the marine monuments for transfer to NOAA.

Here are the names of those monuments, in quotes so you can copy them individually into the search box. You will need to keep this email open while you do that, or copy them into a word document you keep open, and then switch back and forth as you do the searches. Don't start these searches until I get there, you can do coding until then.

“Marianas Trench” “Northeast Canyons and Seamounts” “Pacific Remote Islands”

“Papahānaumokuākea” “Rose Atoll”
